Dear Parents,

We are writing to invite your child to try our Creative Maths course.

This practical maths class will allow children to improve key National Curriculum mathematical skills which also translate into other subject areas such as science, technology and are used in later life:

- logical thinking
- developing a systematic approach
- trial and improvement
- exploration and explanation skills
- convincing and proving
- collaborative learning

The class will run every Monday from 6:30pm – 7:45pm.

We will be running a **Free Taster Session** of the new Creative Maths course on **Monday 27th November** from **6:30 to 7:45**.

We anticipate demand will be very high for the course and we would advise that if you are interested please speak to one of the managers as soon as possible to ensure attendance to the Free Taster.

For any more information, speak to one of the team when next in the centre or on the contact details given above.

Many thanks,

The Wembley Team
