Barham's Curriculum Intent 2019-2020

Our curriculum is centered around 17 Goals to Transform Our World In 2015, countries adopted the 2030 Agenda for Sustainable Development and its 17 Sustainable Development Goals. In 2016, the Paris Agreement on climate change entered into force, addressing the need to limit the rise of global temperatures.

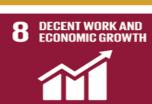

At Barham we share the view that the fundamental goal of a world class education is to ensure pupils make a meaningful contribution within their community and beyond. For this reason, our curriculum links to Oxfam's global citizenship and the United Nations sustainable development goals. We believe that global learning helps pupils make sense of the increasingly complex and rapidly changing world in which they live. Our curriculum enables pupils to think critically about world issues and to develop an awareness of the impact our own actions can have on others.

We have selected six core global learning themes to underpin our curriculum and each theme is broken down into knowledge and understanding, skills and attitudes

The key elements for developing active and responsible global citizenship to transform our world are identified below as:

- Knowledge and understanding
- Skills
- Attitudes

The following pages show progression of each of these key elements across the school.

Knowledge and understanding	Skills	Attitudes
1. Good Health and Well-Being (3)	Self-awareness and reflection	Sense of identity
	Informed and reflective action	#Be Proud
2. Quality Education (4)	Communication	Commitment to participation and inclusion Ability to manage complexity and uncertainty
3. Gender Equality (5)/ Reduced	Empathy	uncertainty
Inequalities (10)	Linpatity	Respect for people and human rights
		Value diversity
4. Climate Action (13)	Informed and reflective action	Concern for the environment an commitment to sustainable development
5. Peace, Justice and Strong Institutions (16)	Cooperation and conflict resolution	Commitment to social justice and equity Belief that people can bring around change
6. Clean Water and Sanitation (6)	Critical and creative thinking	Respect for people and human rights

Skills	Recognise,	To be able to	Recognise	Show right	Identify	Explore reasons for	Recognise personal	Evaluate ways in
(Self-awareness and reflection) (Informed and reflective action)	name and deal with feelings in a positive way Notice some effects of own actions on others Identify how people are feeling (e.g. happy, sad, worried) Self-care e.g. wearing an	articulate and share their thoughts and explain why Show respect and know that own actions affect others Talk about and infer own and others' feelings Infer feelings of others, recognise facial	effects of own behaviour on others and use this to help make choices Identify matters that are important to self and others Learn from mistakes and use feedback	attitude for behaviour and learning Understand and explain personal emotions Recognise and resolve conflicts	connections between personal decisions and issues affecting people locally and globally Explore reasons for negative feelings towards others and in new or difficult situations	negative feelings towards others and in new or difficult situations Show empathy towards others emotions	strengths and weaknesses Evaluate ways in which own emotions, words and behaviour can affect people both locally and globally -How to manage changes you may be going through	which own emotions, words and behaviour can affect people both locally and globally - collective responsibili ty - Mental health awareness: how to manage stress and anxiety with focus
Attitude (Sense of identity #Be Proud)	apron, wash hands Awareness of self and own uniqueness Sense of selfworth and worth of others	Be proud of own achievement Handle changes in routine and new situations	Sense of belonging and valuing of relationships with others Awareness of, and pride in, own individuality	Understanding of where you are from and pride of own individuality Speak about self in positive terms Try your best and take pride in all their work	Positivity about the ways in which one is both similar to others and uniquely different Value what contributes to own identity	Understanding your place in society Knowing yourself and identity Body image and building confidence	Valuing of own and others' individuality Openness to new ideas and perspectives which challenge own	on: exams, transitions to high school Knowing yourself well enough to cope in high school and accept the people you meet Respectfully challenge others' opinions

2. Quality Education (4) Knowledge and Understanding	Rules in class and school How rules can help us	Rules in class and school How rules can help us Equality of education for each child Good attitude to learning	How to take part in making and changing rules in own class / school Uneven sharing of power and how some people are excluded from decision-making	Add new rules/adjust if need be Valuing what they have in terms of education e.g. comparing to other countries Being fair, opportunities for all and equal access to the curriculum Empowerment for 'voice'	The need for rules in own school and wider society and how people can take part in making and changing them Basics of how own country and region is governed. Uneven sharing of power and how some people are excluded from decision-making	Importance of equal education for all e.g. Malala Knowledge of places where education is not equal for all.	Basic national, regional (e.g. EU) and global governance structures and systems (U.N, NATO,) and differences between countries. How a lack of power and representation can result in discrimination and exclusion The power of collective action and role of social movements.	How a lack of power and representation can result in discrimination and exclusion Debate global governance of other schools abroad Evaluate the role and power of collective action and social movements.
Skills (Communication)	Ask questions Suggest a way to solve a problem wonder about ideas	Share resources Take turns Share views and opinions	Ask relevant questions Consider merits of different viewpoints Use different approaches to solve problems	Having respect and tolerance for different viewpoints and beliefs Debate personal opinion and viewpoints If one approach doesn't work, change needs to happen	Begin to identify bias and opinion in everyday life. Give evidence for an argument, assess different viewpoints and present counterarguments Imagine alternative possibilities and suggest	Continue to consolidate skills in being able to identify bias and opinion in everyday life and begin to look at examples in the media Give more than one example of evidence for an argument, assess different viewpoints and present counterarguments with confidence and conviction	Consolidate skills in identifying bias in the media. Begin to evaluate media and other sources for bias, stereotypes and range of voices and perspectives Discuss own and others' assumptions about people and issues	Confidently evaluate media and other sources for bias, stereotypes and range of voices and perspectives Analyse own and others' assumptions about people and issues

								with opposition views. Recognition of diverse perspectives on any issue, and that the majority view is not always right.
4. Climate Action (13)	Living things and their needs How to take care of immediate	Introduce ways to minimise waste How to take	Positive and negative impacts of people's actions on others and	Identifying the key reasons for importance of certain ecosystems around the	Understanding on a deeper level people's dependencies on the environment	Understanding the consequence of not looking after the environment e.g. Global warming Desertification;	Differing views about development and quality of life and their measurement UN Sustainable	Be able to identify global inequalities in ecological footprints and the reasons for them (e.g. differences
Knowledge and Understanding	environment (my classroom) Possibility of change in the future	care of the environment around me (my e.g. recycling paper) e.g. growing plants (O2 and food) Turning the tap off	the environment (e.g. Dropping litter, not recycling, reusing plastic)	world e.g. Amazon, Antarctic Be able to describe different types of recycling: Key reasons of climate change	around the globe – identify key ones - see year 3 Next level of climate change (causes and effects) exploring what the progression is here.	animal species' extinction, Rising sea levels; land corrosion, Melting of sea ice, bee numbers decreasing coral bleaching, 'hole in the ozone layer' Adaptation to depend on the environment	Development Goals and progress against them Importance of biodiversity wider causes and implications of climate change. Awareness of various individuals and	between countries, continents.) Identify and analyse political issues and influences in current news and be able to comment and discuss.
		Teaching children to love/care for animals		(causes and effects) Key question - what are the key causes? Be able to describe ways to live in a environmentally - responsible way. E.G. what	Discuss how being a vegetarian/ vegan can impact the world Suggesting ways to look after the environment	environment	organisations that are doing things in the field of climate change: Greenpeace etc.	 Oil rig money Fracking Forest fires Protests (peaceful vs non-peaceful) Treaties

				can the everyday person do on a day to day basis? (Save a bee, buy a grocery bag, metal straws etc.) -What is my carbon footprint?	(around the world) e.g. reduce logging, mass plastic production, helping bee population grow, reducing emissions, Understanding conservation			
Skills (Informed and reflective action)	Support others in groups.	Support others in group or class	Contribute actively and constructivel y to the life of own class and school e.g. helpers for the day Voice when something is unfair	Contribute actively and constructively to the life of own class and school e.g. helpers for the day Take action when something is unfair	Participate in decision making in school Contribute to the well-being of the wider community Share opinions and evidence on issues with others including decision-makers and elected representatives	Participate in decision making in school Contribute to the well-being of the wider community Share opinions and evidence on issues with others including decision-makers and elected representatives	Identify and plan appropriate action(s) and opportunities to make own voice heard	Challenge viewpoints which perpetuate inequality and injustice Reflect on learning from taking action
(Concern for the environment an commitment to sustainable development)	Appreciation of, and care for, living things and own environment Sense of wonder and	Take care of the environment in school Comment on changes in their	Concern about the local environment and willingness to care for it	Have a voice and be assertive What can we do to further improve this	Sense of responsibility for the environment and the use of resources	Commitment to taking action to protect and improve the environment and quality of life for people locally and globally	Appreciation of interdependence between people and planet	Concern about the effects of lifestyles and consumer choices on people and the planet

5. Peace, Justice and Strong Institutions (16) Knowledge and Understanding	curiosity about the world Starting to value resources How own actions have consequences Some basic ways to avoid, manage and resolve conflict	immediate environment Understand that not everybody thinks the same thing Begin to solve own problems using words Talk about fair/unfair	Taking care of resources and not wasting them Causes of disagreemen t and conflict at personal, levels Some ways of avoiding, managing and resolving conflict	Causes of disagreement and conflict at personal, classroom and household levels -Suggest ways of resolving personal and classroom conflict confidently	Examples of causes and effects of conflicts past and present in own society and others (through Ancient history and modern times.) Symbols of peace through different cultures, times and countries Strong institutions: NHS, Police Force	Some causes and effects of current conflict at all levels from local to national to global Strategies for managing, resolving and preventing conflict, including 'win-win' solutions Strong institutions: Armed forces- Army, Navy, Air force	Wider causes and effects of conflict at all levels – identify and focus on key ones Importance of resolving conflict fairly -Strong institutions: Fire Service, Legal age of responsibility, judicial system in UK. (Magistrate, crown/high/supreme court et.)	Wider causes and effects of conflict at all levels - identify and focus on key ones Role of non-violent protest in social and political change -Strong institutions: RED CROSS, UNICEF, E.U. NATO, U.N, G7, WAR CRIMES COUNCILS
Skills (Cooperation and conflict resolution)	Participate in group activities Take turns and share Manage disputes peacefully	Participate in group activities Take turns and share Manage disputes peacefully	Play and work cooperativel y Help to ensure that everyone in own group is included	-play and work cooperatively Help to ensure that everyone in own group is included Begin to show tact and diplomacy	Work cooperatively to solve problems or achieve goals Start to use strategies to manage anger, frustration and aggressive feelings	Work cooperatively to solve problems or achieve goals Use different strategies to manage anger, frustration and aggressive feelings Use knowledge of others' viewpoints to	Take on different roles in group work Begin to suggest effective strategies for repairing damaged relationships	Take on different roles in group work Employ effective strategies for repairing damaged relationships

Attitude (Commitment to social justice and equity) (Belief that people can bring around change)	Appreciation of, and care for, living things and own environment Sense of wonder and curiosity about the world Starting to value resources	Treat others fairly Appreciation of, and care for, living things and own environment Sense of wonder and curiosity about the world Value resources	Begin to show tact and diplomacy Concern about the local environment and willingness to care for it Taking personal responsibility for care of resources and not wasting them	Concern about the local environment and willingness to care for it Taking collective responsibility for care of resources and not wasting them	Use knowledge of others' viewpoints to resolve problems and compromise Sense of responsibility for the environment and the use of resources Begin to realise the importance of commitment to taking action to protect and improve the environment and quality of life for people locally and globally	resolve problems and compromise Vocal sense of responsibility for the environment and the use of resources Commitment to taking action to protect and improve the environment and quality of life for people locally and globally	Begin to appreciate the interdependence between people and planet Begin to show and voice concern about the effects of lifestyles and consumer choices on people and the planet	Appreciation of interdependence between people and planet Consider and voice concern about the effects of lifestyles and consumer choices on people and the planet
6. Clean Water and Sanitation (6)	Basic hygiene eg. Washing hands, using soap	Know what water is used for in day to day life	Why is getting enough water important	To know that water is a food source To know that	Why is water good for you? How drinking dirty water	Understand the water cycle Understanding some reasons (historic and	Understanding the wider reasons (historic and current) for water pollution on a local, national	Analyse and evaluate ways in which we can clean and preserve water on a global scale
Knowledge and Understanding		Know which water can be drunk safely.	for plants to grow? How does weather link with water? To know about	clean water is good for you to drink as a part of a healthy diet.	understand some ways how water is cleaned for consumption	current) for water pollution on a local, national and global scale Knowing that some countries do not have access to clean water some of the	and global scale Understand and suggest ways in which we can clean and preserve water on a global scale	Learn about and create a model for desalination

Skills (Critical and creative thinking)	Ask questions Suggest a way to solve a problem Wonder about ideas	Ask questions Suggest a way to solve a problem Wonder about ideas	different landscapes that have water/ice. Ask relevant questions Consider merits of different viewpoints Use different approaches to solve problems	Ask relevant questions Consider merits of different viewpoints Use different approaches to solve problems	Raise awareness for plastic in the oceans Irrigation systems Ask challenging questions at an appropriate level to solve problems Begin to identify bias and opinion Give evidence for an argument, assess different viewpoints and present counter-arguments Imagine alternative possibilities and suggest new ideas to solve problems	factors behind this (drought, poverty, industrial pollution etc.) Begin to learn about water filtration Ask challenging questions at an appropriate level to solve problems Begin to identify bias and opinion Give evidence for an argument, assess different viewpoints and present counterarguments Imagine alternative possibilities and suggest new ideas to solve problems	Examine media and other sources for bias, stereotypes and range of voices and a perspectives Analyse own and others' assumptions about people and issues Keep mind open to new ideas	Evaluate media and other sources for bias, stereotypes and range of voices and a perspectives Analyse own and others' assumptions about people and issues Keep mind open to new ideas
(Respect for the environment, the wildlife that lives in it and human rights)	Appreciation of, and care for self and health Sense of wonder and	Appreciation of, and care for self and health Appreciation of, and care	Concern about the local, national and global environment and	Concern about the local, national and global environment	Sense of responsibility for the environment and the use of resources	Vocal sense of responsibility for the world's water sources and water in their own environment	Begin to appreciate the interdependence between people and planet Begin to show and voice concern about	Appreciation of interdependence between people and planet Consider and voice concern about the

curiosity about	for, living	willingness	and willingness	Begin to realise	Commitment to	the effects of	effects of lifestyles
the world	things and	to care for it	to care for it	the importance	taking action to	lifestyles and	and consumer
	own			of commitment	protect and improve	consumer choices on	choices on people
Starting to value	environment	Taking	Taking collective	to taking action	the world's water	people and the	and the planet
resources		personal	responsibility	to protect and	sources and water in	planet	
	Sense of	responsibility	for care of	improve the	their own
