Barham's Curriculum Intent

Our curriculum is centered around 17 Goals to Transform Our World In 2015, countries adopted the 2030 Agenda for Sustainable Development and its 17 Sustainable Development Goals. In 2016, the Paris Agreement on climate change entered into force, addressing the need to limit the rise of global temperatures.

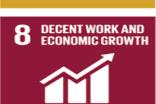

At Barham we share the view that the fundamental goal of a world class education is to ensure pupils make a meaningful contribution within their community and beyond. For this reason, our curriculum links to Oxfam's global citizenship and the United Nations sustainable development goals. We believe that global learning helps pupils make sense of the increasingly complex and rapidly changing world in which they live. Our curriculum enables pupils to think critically about world issues and to develop an awareness of the impact our own actions can have on others.

We have selected six core global learning themes to underpin our curriculum and each theme is broken down into knowledge and understanding, skills and attitudes.

The key elements for developing active and responsible global citizenship to transform our world are identified below as:

- Knowledge and understanding
- Skills
- Attitudes

The following pages show progression of each of these key elements across the school.

Knowledge and understanding	Skills	Attitudes
1. Good Health and Well-Being (3)	Self-awareness and reflection	Sense of identity
	Informed and reflective action	#Be Proud
2. Quality Education (4)	Communication	Commitment to participation and
		inclusion
		Ability to manage complexity and
		uncertainty
3. Gender Equality (5)/ Reduced	Empathy	
Inequalities (10)		Respect for people and human rights
		Value diversity
4. Climate Action (13)	Informed and reflective action	Concern for the environment an
		commitment to sustainable development
5. Peace, Justice and Strong	Cooperation and conflict resolution	Commitment to social justice and equity
Institutions (16)		Belief that people can bring around
		change
6. Clean Water and Sanitation (6)	Critical and creative thinking	Respect for people and human rights

4. Climate Action (13)	Living things and their needs How to take care of immediate	Introduce ways to minimise waste How to take	Positive and negative impacts of people's actions on others and	Identifying the key reasons for importance of certain ecosystems around the	Understanding on a deeper level people's dependencies on the environment	Understanding the consequence of not looking after the environment e.g. Global warming Desertification;	Differing views about development and quality of life and their measurement UN Sustainable	not always right. Be able to identify global inequalities in ecological footprints and the reasons for them (e.g. differences
Knowledge and Understanding	environment (my classroom) Possibility of change in the future	care of the environment around me (my e.g. recycling paper) e.g. growing plants (O2 and food) Turning the tap off Teaching children to love/care for animals	the environment (e.g. Dropping litter, not recycling, reusing plastic)	world e.g. Amazon, Antarctic Be able to describe different types of recycling: Key reasons of climate change (causes and effects) Key question - what are the key causes? Be able to describe ways to live in a environmentally	around the globe – identify key ones - see year 3 Next level of climate change (causes and effects) exploring what the progression is here. Discuss how being a vegetarian/ vegan can impact the world Suggesting ways	animal species' extinction, Rising sea levels; land corrosion, Melting of sea ice, bee numbers decreasing coral bleaching, 'hole in the ozone layer' Adaptation to depend on the environment	Development Goals and progress against them Importance of biodiversity wider causes and implications of climate change. Awareness of various individuals and organisations that are doing things in the field of climate change: Greenpeace etc.	between countries, continents.) Identify and analyse political issues and influences in current news and be able to comment and discuss. Oil rig money Fracking Forest fires Protests (peaceful vs non-peaceful) Treaties

				can the everyday person do on a day to day basis? (Save a bee, buy a grocery bag, metal straws etc.) -What is my carbon footprint?	(around the world) e.g. reduce logging, mass plastic production, helping bee population grow, reducing emissions, Understanding conservation			
Skills (Informed and reflective action)	Support others in groups.	Support others in group or class	Contribute actively and constructivel y to the life of own class and school e.g. helpers for the day Voice when something is unfair	Contribute actively and constructively to the life of own class and school e.g. helpers for the day Take action when something is unfair	Participate in decision making in school Contribute to the well-being of the wider community Share opinions and evidence on issues with others including decision-makers and elected representatives	Participate in decision making in school Contribute to the well-being of the wider community Share opinions and evidence on issues with others including decision-makers and elected representatives	Identify and plan appropriate action(s) and opportunities to make own voice heard	Challenge viewpoints which perpetuate inequality and injustice Reflect on learning from taking action
(Concern for the environment an commitment to sustainable development)	Appreciation of, and care for, living things and own environment Sense of wonder and	Take care of the environment in school Comment on changes in their	Concern about the local environment and willingness to care for it	Have a voice and be assertive What can we do to further improve this	Sense of responsibility for the environment and the use of resources	Commitment to taking action to protect and improve the environment and quality of life for people locally and globally	Appreciation of interdependence between people and planet	Concern about the effects of lifestyles and consumer choices on people and the planet

5. Peace, Justice and Strong Institutions (16) Knowledge and Understanding	curiosity about the world Starting to value resources How own actions have consequences Some basic ways to avoid, manage and resolve conflict	immediate environment Understand that not everybody thinks the same thing Begin to solve own problems using words Talk about fair/unfair	Taking care of resources and not wasting them Causes of disagreemen t and conflict at personal, levels Some ways of avoiding, managing and resolving conflict	Causes of disagreement and conflict at personal, classroom and household levels -Suggest ways of resolving personal and classroom conflict confidently	Examples of causes and effects of conflicts past and present in own society and others (through Ancient history and modern times.) Symbols of peace through different cultures, times and countries Strong institutions: NHS, Police Force	Some causes and effects of current conflict at all levels from local to national to global Strategies for managing, resolving and preventing conflict, including 'win-win' solutions Strong institutions: Armed forces- Army, Navy, Air force	Wider causes and effects of conflict at all levels – identify and focus on key ones Importance of resolving conflict fairly -Strong institutions: Fire Service, Legal age of responsibility, judicial system in UK. (Magistrate, crown/high/supreme court et.)	Wider causes and effects of conflict at all levels - identify and focus on key ones Role of non-violent protest in social and political change -Strong institutions: RED CROSS, UNICEF, E.U. NATO, U.N, G7, WAR CRIMES COUNCILS
Skills (Cooperation and conflict resolution)	Participate in group activities Take turns and share Manage disputes peacefully	Participate in group activities Take turns and share Manage disputes peacefully	Play and work cooperativel y Help to ensure that everyone in own group is included	-play and work cooperatively Help to ensure that everyone in own group is included Begin to show tact and diplomacy	Work cooperatively to solve problems or achieve goals Start to use strategies to manage anger, frustration and aggressive feelings	Work cooperatively to solve problems or achieve goals Use different strategies to manage anger, frustration and aggressive feelings Use knowledge of others' viewpoints to	Take on different roles in group work Begin to suggest effective strategies for repairing damaged relationships	Take on different roles in group work Employ effective strategies for repairing damaged relationships

Attitude (Commitment to social justice and equity) (Belief that people can bring around change)	Appreciation of, and care for, living things and own environment Sense of wonder and curiosity about the world Starting to value resources	Treat others fairly Appreciation of, and care for, living things and own environment Sense of wonder and curiosity about the world Value resources	Begin to show tact and diplomacy Concern about the local environment and willingness to care for it Taking personal responsibility for care of resources and not wasting them	Concern about the local environment and willingness to care for it Taking collective responsibility for care of resources and not wasting them	Use knowledge of others' viewpoints to resolve problems and compromise Sense of responsibility for the environment and the use of resources Begin to realise the importance of commitment to taking action to protect and improve the environment and quality of life for people locally and	resolve problems and compromise Vocal sense of responsibility for the environment and the use of resources Commitment to taking action to protect and improve the environment and quality of life for people locally and globally	Begin to appreciate the interdependence between people and planet Begin to show and voice concern about the effects of lifestyles and consumer choices on people and the planet	Appreciation of interdependence between people and planet Consider and voice concern about the effects of lifestyles and consumer choices on people and the planet
6. Clean Water and Sanitation (6)	Basic hygiene eg. Washing hands, using soap	Know what water is used for in day to day life	Why is getting enough water important	To know that water is a food source To know that	globally Why is water good for you? How drinking dirty water	Understand the water cycle Understanding some reasons (historic and	Understanding the wider reasons (historic and current) for water pollution on a local, national	Analyse and evaluate ways in which we can clean and preserve water on a global scale
Knowledge and Understanding		Know which water can be drunk safely.	for plants to grow? How does weather link with water? To know about	clean water is good for you to drink as a part of a healthy diet.	Understand some ways how water is cleaned for consumption	current) for water pollution on a local, national and global scale Knowing that some countries do not have access to clean water some of the	and global scale Understand and suggest ways in which we can clean and preserve water on a global scale	Learn about and create a model for desalination

Skills (Critical and creative thinking)	Ask questions Suggest a way to solve a problem Wonder about ideas	Ask questions Suggest a way to solve a problem Wonder about ideas	different landscapes that have water/ice. Ask relevant questions Consider merits of different viewpoints Use different approaches to solve problems	Ask relevant questions Consider merits of different viewpoints Use different approaches to solve problems	Raise awareness for plastic in the oceans Irrigation systems Ask challenging questions at an appropriate level to solve problems Begin to identify bias and opinion Give evidence for an argument, assess different viewpoints and present counterarguments Imagine alternative possibilities and suggest new ideas to solve problems	factors behind this (drought, poverty, industrial pollution etc.) Begin to learn about water filtration Ask challenging questions at an appropriate level to solve problems Begin to identify bias and opinion Give evidence for an argument, assess different viewpoints and present counterarguments Imagine alternative possibilities and suggest new ideas to solve problems	Examine media and other sources for bias, stereotypes and range of voices and a perspectives Analyse own and others' assumptions about people and issues Keep mind open to new ideas	Evaluate media and other sources for bias, stereotypes and range of voices and a perspectives Analyse own and others' assumptions about people and issues Keep mind open to new ideas
(Respect for the environment, the wildlife that lives in it and human rights)	Appreciation of, and care for self and health Sense of wonder and	Appreciation of, and care for self and health Appreciation of, and care	Concern about the local, national and global environment and	Concern about the local, national and global environment	Sense of responsibility for the environment and the use of resources	Vocal sense of responsibility for the world's water sources and water in their own environment	Begin to appreciate the interdependence between people and planet Begin to show and voice concern about	Appreciation of interdependence between people and planet Consider and voice concern about the
